Warning

- 1. This Kyocera LCD module has been specifically designed for use only in electronic devices and industrial machines in the area of audio control, office automation, industrial control, home appliances, etc. The module should not be used in applications where the highest level of safety and reliability are required and module failure or malfunction of such module results in physical harm or loss of life, as well as enormous damage or loss. Such fields of applications include, without limitation, medical, aerospace, communications infrastructure, atomic energy control. Kyocera expressly disclaims any and all liability resulting in any way to the use of the module in such applications.
- 2. Customer agrees to indemnify, defend and hold Kyocera harmless from and against any and all actions, claims, damages, liabilities, awards, costs, and expenses, including legal expenses, resulting from or arising out of Customer's use, or sale for use, or Kyocera modules in applications.

Caution

1. Kyocera shall have the right, which Customer hereby acknowledges, to immediately scrap or destroy tooling for Kyocera modules for which no Purchase Orders have been received from the Customer in a two-year period.

1. Application

This document defines the specification of TCG121XGLPAPNN-AN20. (RoHS Compliant)

2. Construction and outline

LCD : Transmissive color dot matrix type TFT

Backlight system : LED

Polarizer : Anti-Glare treatment

Interface : LVDS

Additional circuit : Timing controller, Power supply (3.3V input)

With constant current circuit for LED Backlight(12V input)

3. Mechanical specifications

| Item | Specification | Unit |
|-----------------------|---|------|
| Outline dimensions 1) | 260.5(W)×(203.4)(H)×10.3(D) | mm |
| Active area | 245.76(W)×184.32(H) (30.8cm/12.1 inch(Diagonal)) | mm |
| Dot format | 1,024×(B,G,R)(W)×768(H) | dot |
| Dot pitch | 0.08(W)×0.24(H) | mm |
| Base color 2) | Normally Black | - |
| Mass | (670) | g |

- 1) Projection not included. Please refer to outline for details.
- 2) Due to the characteristics of the LCD material, the color varies with environmental temperature.

| Spec No. | P | art No. | Page |
|---------------|----------|---------------------|------|
| TQ3C-8EAF0-E1 | YAL14-00 | TCG121XGLPAPNN-AN20 | 2 |

4. Absolute maximum ratings

4-1. Electrical absolute maximum ratings

| Item | | | Symbol | Min. | Max. | Unit |
|-----------------------|----|----------------------------|--------------|------|------------------------|------|
| Supply voltage(+3.3V) | | | $V_{ m DD}$ | -0.3 | 3.95 | V |
| Supply voltage(+12V) | | | $V_{\rm IN}$ | -0.3 | 14.0 | V |
| | | RxINi+, RxINi- (i=0,1,2,3) | V_{I1} | -0.3 | V _{DD} +0.3 | V |
| Input signal | | CK IN+, CK IN- | V_{I2} | -0.3 | V_{DD} +0.3 | V |
| Voltage 1 | 1) | MODE, SC | V_{I3} | -0.3 | V _{DD} +0.3 | V |
| | | BLBRT, BLEN | V_{I4} | -0.3 | $V_{\rm IN}$ | V |

1) V_{DD} must be supplied correctly within the range described in 5-1.

4-2. Environmental absolute maximum ratings

| Item | | Symbol | Min. | Max. | Unit |
|--------------------------------|----|----------------------------|------|------|----------------------|
| Operating temperature(Ambient) | 1) | Top(Ambient) | -30 | 80 | $^{\circ}\mathrm{C}$ |
| Operating temperature(Panel) | 2) | T _{OP} (Panel) | -30 | 80 | |
| Storage temperature | 3) | Tsto | -30 | 80 | °C |
| Operating humidity | 4) | H_{OP} | 10 | 5) | %RH |
| Storage humidity | 4) | ${ m H}_{ m STO}$ | 10 | 5) | %RH |
| Vibration | | - | 6) | 6) | - |
| Shock | | - | 7) | 7) | - |

- 1) Operating temperature means a temperature which operation shall be guaranteed. Since display performance is evaluated at 25°C, another temperature range should be confirmed.
- 2) Panel surface temperature (all the surface)
- 3) Temp. = -30°C < 48h, Temp. = 80°C < 168h

 Store LCD at normal temperature/humidity. Keep them free from vibration and shock.

 An LCD that is kept at a low or a high temperature for a long time can be defective due to other conditions, even if the low or high temperature satisfies the standard.

 (Please refer to "Precautions for Use" for details.
- 4) Non-condensing
- 5) Temp. ≤ 40°C, 85%RH Max.
 Temp. > 40°C, Absolute humidity shall be less than 85%RH at 40°C.

6)

| Frequency | 10∼55 Hz | Acceleration value |
|-----------------|----------|-----------------------------|
| Vibration width | 0.15mm | $(0.3\sim 9 \text{ m/s}^2)$ |
| Interval | 10-55-10 | Hz 1 minutes |

2 hours in each direction X, Y, Z (6 hours total) EIAJ ED-2531

 Acceleration: 490 m/s², Pulse width: 11 ms 3 times in each direction: ±X, ±Y, ±Z EIAJ ED-2531

10. Warranty

10-1. Incoming inspection

Please inspect the LCD within one month after your receipt.

10-2. Production warranty

Kyocera Display warrants its LCD's for a period of 12 months from the ship date. Kyocera Display shall, by mutual agreement, replace or re-work defective LCD's that are shown to be Kyocera Display's responsibility.

11. Precautions for use

11-1. Installation of the LCD

- 1) A transparent protection plate shall be added to protect the LCD and its polarizer.
- 2) The LCD shall be installed so that there is no pressure on the LSI chips.
- 3) Since this product is wide viewing product, occurrence level of in-plane unevenness by the external stress is different compared to current normal viewing product. So there is a possibility that in-plane unevenness will be occurred by over twist, strain giving by attaching to LCD, and over pressure to touch panel. Please be careful of stress when designing the housing.
- 4) A transparent protection sheet is attached to the polarizer. Please remove the protection film slowly before use, paying attention to static electricity.

11-2. Static electricity

- 1) Since CMOS ICs are mounted directly onto the LCD glass, protection from static electricity is required.
- 2) Workers should use body grounding. Operator should wear ground straps.

11-3. LCD operation

- 1) The LCD shall be operated within the limits specified. Operation at values outside of these limits may shorten life, and/or harm display images.
- 2) Please select the best display pattern based on your evaluation because flicker, lines or nonuniformity or unevenness can be visible depending on display patterns.

11-4. Storage

- 1) The LCD shall be stored within the temperature and humidity limits specified. Store in a dark area, and protect the LCD from direct sunlight or fluorescent light.
- 2) Always store the LCD so that it is free from external pressure onto it.

11-5. Usage

- 1) <u>DO NOT</u> store in a high humidity environment for extended periods. Polarizer degradation bubbles, and/or peeling off of the polarizer may result.
- 2) The front polarizer is easily scratched or damaged. Prevent touching it with any hard material, and from being pushed or rubbed.
- 3) The LCD screen may be cleaned by wiping the screen surface with a soft cloth or cotton pad using a little Ethanol.
- 4) Water may cause damage or discoloration of the polarizer. Clean condensation or moisture from any source immediately.
- 5) Always keep the LCD free from condensation during testing. Condensation may permanently spot or stain the polarizer.
- 6) Do not disassemble LCD because it will result in damage.
- 7) This Kyocera Display LCD has been specifically designed for use in general electronic devices, but not for use in a special environment such as usage in an active gas. Hence, when the LCD is supposed to be used in a special environment, evaluate the LCD thoroughly beforehand and do not expose the LCD to chemicals such as an active gas.
- 8) Please do not use solid-base image pattern for long hours because a temporary afterimage may appear. We recommend using screen saver etc. in cases where a solid-base image pattern must be used.
- 9) Liquid crystal may leak when the LCD is broken. Be careful not to let the fluid go into your eyes and mouth. In the case the fluid touches your body; rinse it off right away with water and soap.

12. Reliability test data

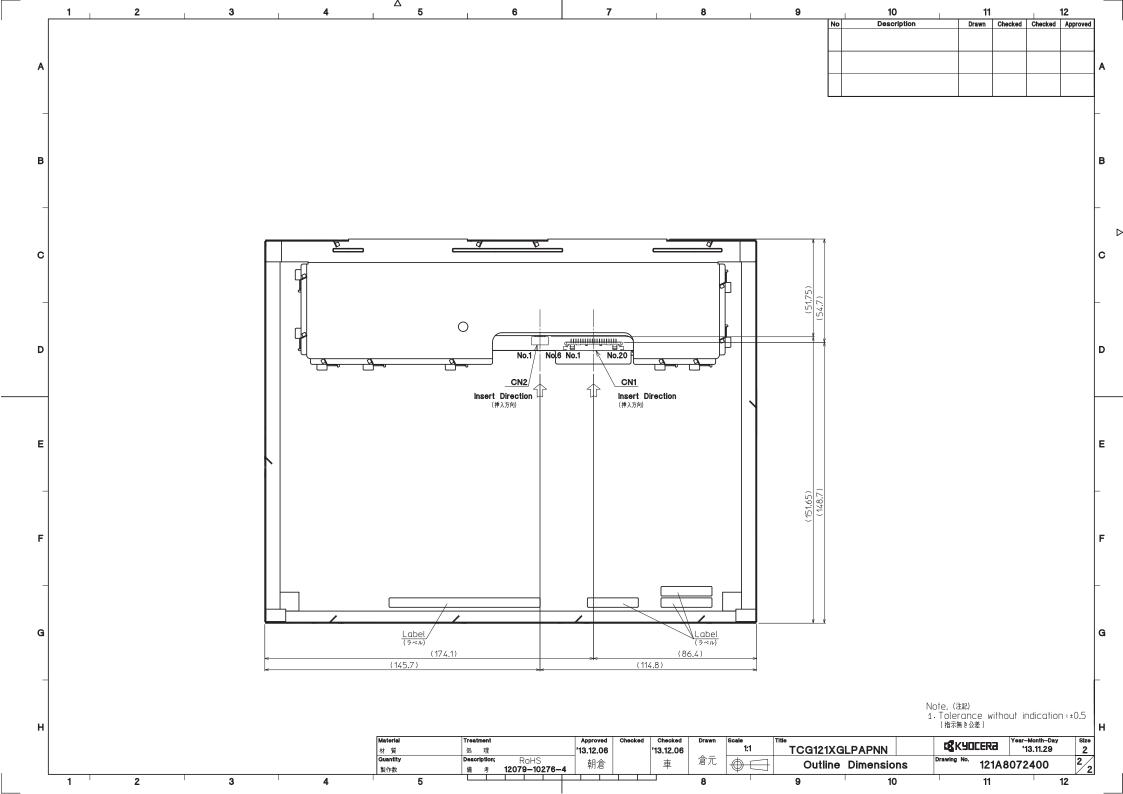

| Test item | Test condition | Test time | Jud | gement |
|--------------------------------|--------------------------------------|-----------|--|---|
| High temp. atmosphere | 80°C | 240h | Display function Display quality Current consumption | : No defect : No defect : No defect |
| Low temp. atmosphere | -30°C | 240h | Display function Display quality Current consumption | No defectNo defectNo defect |
| High temp. humidity atmosphere | 40°C 90% RH | 240h | Display function Display quality Current consumption | : No defect : No defect : No defect |
| Temp. cycle | -30°C 0.5h R.T. 0.5h 80°C 0.5h | 10cycles | Display function Display quality Current consumption | : No defect : No defect : No defect |
| High temp. operation | 70°C | 500h | Display function Display quality Current consumption | No defectNo defectNo defect |

- 1) Each test item uses a test LCD only once. The tested LCD is not used in any other tests.
- 2) The LCD is tested in circumstances in which there is no condensation.
- 3) The reliability test is not an out-going inspection.
- 4) The result of the reliability test is for your reference purpose only.

 The reliability test is conducted only to examine the LCD's capability.
